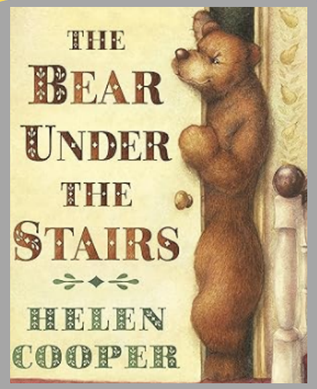
Living Things and Coastal Places

English

Oracy in English lessons is so important! Think it. Say it. Write it. Read it through! We will be developing these skills and also learning all about: questions, homophones, tenses, letters, statements, fact and fiction and our final piece of work will be a glorious information book about bears!

We are reading ....



Reading

We use our Little Wandle books to read 3 times a week to an adult. We are very lucky that some other grown ups come in to read with us throughout the week too! Thank you! Please also continue to share other stories and non-fiction texts at home.

Maths

We will continue to develop our skills in multiplication and division - specifically looking at the 2s, 5s and 10 times tables.
Remember to log into Numbots and TTRS to challenge yourself at home!
We will also be exploring length, height, mass capacity and temperature.

PSHE

This term, we will be exploring our emotions, how to keep active and healthy and ways we can relax. We will also talk about how we can be successful and what having a 'growth mindset' means.

Geography

Put your maps in your bags, we are exploring the coast this half term! We will find out where the seas and oceans are that surround the UK, be able to identify features of the beautiful Jurassic Coastline and find out more about Weymouth and Bognor Regis!

Computing

Children will use technology to answer a quiz, present a story, make a non-fiction fact file about the UK and make a presentation. The children love Computing and have already shown some very impressive skills!

Music

To complement our topic, we will be investigating sounds from different parts of the UK - seaside, countryside and city sounds will be explored and we will create our own composition using these sounds.

Science

Our topic in Science this term is Life cycles. We will find out about human life cycles, match offspring to their parent and explore the life cycle of a chick, butterfly or frog! Start re-reading your child's favourite farm stories - and get ready to hear lots of renditions of 'Old MacDonald had a Farm...'!

DT

Please bring in your cardboard recycling! We will be exploring structures and designing and making a chair for a bear! Children will find out about the strength of materials and they will evaluate their chair and decide how they could improve it.

PE

Our PE this term is made up of two units. One is dance, and the children will learn to link actions, hear counts of 8 and use repeated phrases.
Our other unit is sending and recieving and we will work on throwing and catching skills.

RE

This term the children will be finding out about prophets, promises and world views. Children will learn about Muhammad, Jesus and Guru Nanak.
